

NTN's Sentinel™ Series Eliminates Unplanned Downtime on Canning Line

A major producer of soft drinks and other beverages was experiencing semi-annual bearing failures on its canning line due to the frequent washdowns required in the production area. The recurring failures were resulting in over \$200,000 in lost production each year.

NTN's engineering and sales support team performed a thorough evaluation of the production line and determined the bearing failures were being caused by grease washout from daily equipment washdowns. Poor lubrication practices were also causing grease leakage and blowout, creating additional safety issues on the production floor.

The NTN Solution

NTN's team recommended that the bearings being used in the canning line be replaced with our Sentinel Series mounted units. Our Sentinel Series features corrosion-resistant stainless steel ball bearings with seals and NSF H1 registered solid lubricant. The solid lubrication provides up to 21 times better washout resistance than standard grease and the seals provide improved protection over standard deep groove ball bearings, which is critical to extending the life of equipment exposed to moisture. Furthermore, our Sentinel Series line of mounted units are cap capable, providing an additional layer of protection.

The Result

The NTN solution lasted over two years, completely eliminating unplanned downtime. The increased uptime, reduced maintenance, and decrease in bearing spend resulted in \$127,794 in documented savings for the customer.

VALUE ADDED BREAKDOWN

UPTIME IMPROVEMENT

\$120,780

REDUCED ACQUISITION COST

\$6,214

MAINTENANCE REDUCTION

\$800

DOCUMENTED COST SAVINGS

\$127,794

THE NTN ADVANTAGE: SOLID LUBRICATION

Solid lubrication is a maintenance-free solution that eliminates greasing requirements and significantly improves life in harsh wash-down applications.

- **NSF H1** compliant
- **21X** the grease washout resistance
- **Zero** grease leakage
- **Zero** re-lubrication

Nonfood Compounds
(Category Code H1)

SENTINEL SERIES FEATURES & BENEFITS

- Food-grade solid lubricant eliminates maintenance, resists wash-out
- Stainless steel or thermoplastic housings with stainless steel inserts prevent corrosion from moisture and harsh cleaning agents
- All units come equipped with your choice of open or closed cover configurations

Beyond Bearings

Training. Installation Support.
Trouble-shooting. And more.

When you choose NTN, your team is equipped with all the necessary tools and resources to get the job done right. From installation to problem-solving, we'll be there with the hands-on support you need to take on your toughest challenges. This includes extra services such as:

Technical Training Unit

On-site, mobile training unit offering specialized, hands-on instruction from NTN engineers

Product Training School

Three days of in-depth instruction from NTN engineers at headquarters

eKnowledge

WEB-BASED TRAINING PROGRAM

Six online product training modules covering different bearing types and nomenclature

NTN Bearing Finder

Customizable search tool featuring exhaustive data sets, comprehensive part interchanges and interactive CAD drawings

NTN
